

DIGITAL CAMERA LCD SCREEN PROTECTOR ACCESSORY

Abstract

A protective device for a digital camera view
finder of the LCD screen type includes a frame adapted
5 to fit around edges of the viewfinder having connectors
for connecting the frame to edges of the viewfinder, and
a window viewing portion surrounded and supported by the
frame providing unobstructed viewing of the LCD screen
through the window. A glare reduction device is
10 connectable to the protective device to provide glare
free viewing of the LCD screen.
